

FOR IMMEDIATE RELEASE

Mulcare Pipeline Solutions as SENSIT's New Authorized Representative

August 2026

SENSIT Technologies is pleased to announce that Mulcare Pipeline Solutions will become our new authorized representative effective September 1, 2026, supporting customers throughout the Northeast region, including Maine, New Hampshire, Vermont, Connecticut, West Virginia, Massachusetts, New Jersey, New York, Pennsylvania, Maryland, Delaware, Rhode Island, and Virginia.

This appointment expands SENSIT's regional presence and provides customers with greater access to SENSIT's gas leak detection, gas analysis, and emissions monitoring solutions. Customers throughout the territory will have access to local product expertise, application guidance, demonstrations, and sales support through Mulcare Pipeline Solutions.

Together, SENSIT and Mulcare are committed to helping utilities, municipalities, contractors, and natural gas professionals improve safety, efficiency, and regulatory compliance through reliable technology and responsive regional representation.

About SENSIT Technologies

For over 45 years, SENSIT has been at the forefront of gas detection innovation, designing and manufacturing reliable leak detection, gas analysis, and monitoring solutions trusted by utilities, emergency responders, industrial facilities, and environmental professionals worldwide.

SENSIT

About Mulcare Pipeline Solutions

Since 1923, Mulcare Pipeline Solutions has served the natural gas distribution industry. They provide cutting edge technology, expert field services, training, and technical support to utilities, municipalities, contractors, and interstate transmission pipeline operators throughout the Northeast United States.
